"GDW" Series

INDUSTRIAL GLYCOL FEED PACKAGE

Specification WRTNGLYGDW

Written: February 2020

1.0 DESCRIPTION

1.1 AUTOMATIC INDUSTRIAL DOUBLE WALL GLYCOL FEED PACKAGE: Shall be manufactured by General Treatment Products, or approved equal and consist of a 150% containment polyethylene tank and overflow basin, threaded manway, carbon steel wall mount frame, lockable NEMA 4X control panel, low level wand float switch, 1/3HP open motor bronze gear pump with internal pressure relief, pressure switch, pressure relief valve, check valve, suction strainer screen and wand assembly, PVC plumbing and reinforced butyl rubber hose assemblies.

2.0 MATERIALS

threaded manway with weighing up to 1.9 spe oversized pump mour constructed of linear lo	n built in vent. Tank is ecific gravity. Tank top nt area, 2" FNPT cappe w-density polyethylene	s standard heavy duty or "Utility Cover", shall ed fitting and mixer m as manufactured by Ex	type and shall include minimum 8" design and able to handle liquids incorporate, but not be limited to, sount pad. Primary tank Shall be exon Mobil 8460 LLDPE, with 0.938 or approved equal. Tank Available	
18 Gallon 160 Gallon	☐ 35 Gallon ☐ 220 Gallon	☐ 65 Gallon	☐ 120 Gallon	
2.2 OVERFLOW BASIN: Shall be OD green and designed with weather guard collar and come standard in "U" shape design to utilize corner space and be able to view contents or leaks without removing primary tank. Viewing port shall be 2" FNPT fitting with cap.				
square tube and HR a plumbing assembly, co	ingle. Welded frame sl	nall be of ample streng orackets for hanging lev	be constructed from carbon steel ofth to hold gear pump, discharge wel and suction wand when not in	
be capable of a minimu Hertz, open drip proof	im 1.3 gallons per min	ute against 100 PSI. Mo I to pressure control circ	ssure relief valve. Gear pump shall otor shall be 115 VAC, 1 Phase, 60 cuit.	
Pump Curve: 2.1GPM @ Optional Pump Outputs	20PSI, 1.9GPM @ 40PS	I, 1.7GPM @ 60PSI, 1.50	GPM @ 80PSI, 1.3GPM @ 100PSI	
☐ "-LP" Pump: 10.8G	PM free flow, 3/4HP	11.5AMP	GPM @ 80PSI, 3.0GPM @ 100PSI 0.0GPM @ 80PSI, 9.7GPM @ 100PSI	
2.5 PRESSURE SWITCH: Pressure switch and control circuit shall be designed for pressures as shown below. Pressure switch shall turn on pump on falling pressure and turn off pump on rising pressure. Standard pressure range is Code 1, 10-45 cut-in, 20-50 cut-out, 10-30 pressure differential. Optional Pressure Ranges Include:				
	n, 65-100 cut-out, 20-4 , 9-30 cut-out, 6-20 pr

INDUSTRIAL GLYCOL FEED PACKAGE

Specification WRTNGLYGDW

Written: February 2020

2.6 CONTROL PANEL: Polycarbonate NEMA 4X lockable control panel shall be of ample size needed for equipment and servicing of electrical components. All components shall be installed behind clear viewing panel and have locking hasp to deter tampering. Wiring diagram shall be color coded for easy trouble shooting. All internal wiring shall be of ample gauge for supply voltage and amp draw. Controls shall be, but not limited to, main power switch and indicator, pump manual/off/auto switch and indicator and red low level indicator. All indicator lights shall be LED and designed for continuous use. Control panel comes complete with 8FT 16GA 115VAC power cord.

2.7 DISCHARGE MANIFOLD: Discharge manifold is made from Sch80 PVC and will be mounted securely
to the system. Manifold is to include brass tubing pump connection, pressure switch port, pressure
gauge port, pressure relief port and brass isolation valve. System connection is ½" NPT.
Code "HM" Carbon Steel High Temp Manifold

- 2.8 PRESSURE RELIEF VALVE: Brass pressure relief valve shall have adjustment handle and have brass seat and elastomeric seal. Valve shall be of ample size to handle full pump.
- 2.9 CHECK VALVE: Back flow check valve shall be tapered body design with an enlarged valve chamber to reduce valve chatter and clogging. Valve shall be constructed of bronze and stainless steel and have a raised radius valve seat for positive seal.
- 2.10 LOW LEVEL SWITCH: Polypro low level switch with fitting shall be interlocked with 5 AMP relay and stop glycol feed pump when liquid reaches factory set level. Low level circuit will then turn on RED indicator light and initiate 115 VAC 10 amp circuit.
- 2.11 PRESSURE AND TEMPERATURE LIMITATIONS: Shall have maximum operating perimeters of 150PSI @ 85F.

2.12 OPTIONAL FEATURES: Select options from below.
☐ Code "D" Dual Pumps with dual manifolds, control switches and indicators
☐ Code "HM" High temperature manifold
Code "ET" 2.1-gallon expansion tank
Code "AL" 95 decibel audible alarm and silence switch
☐ Code "DC" Remote dry contact on low level
☐ Code "MX" Batch mixer, mount bracket and control switch
☐ Code "HL" High level sensor wired to level circuit
Code "TEFC" Totally enclosed Fan Cooled pump motor
☐ Code "MTR/STR" Motor starter, 20 AMP
☐ Code "AUX" Auxiliary pump adder (Standby)
☐ Code "ALT" Alternating pump adder
☐ Code "EMS05" Dry contact control box for up to 5 sensing points

3.0 WARRANTY

General Treatment Products Gly-Pack Feed Systems are guaranteed for two years from date of shipment against manufacturing defects in material and workmanship which develop in the service for which they are designed. We will repair or replace a defective part of this system when returned to our factory with freight prepaid; providing that the part is found to be defective upon inspection. We assume no liability for labor and/or other expenses in making repairs or adjustments.
